

## Interested in taking part in research?

Contact details are overleaf

The NHS Research Scotland Neuroprogressive and Dementia Network (NRS NDN) is the leading NHS organisation in Scotland for clinical research into memory impairment, dementia and other neuroprogressive conditions like Parkinson's disease, Huntington's disease and Motor Neurone Disease (MND). We support a wide range of research conducted within the NHS, Scottish universities and in care homes.

We run a portfolio of studies, including clinical trials that are investigating the effects of new treatments, and questionnaire-based studies that can be completed at home.

By sending your information, you agree to it being held at the Neuroprogressive and Dementia Network offices in NHS Tayside; and for it to be uploaded to the Healthcare Informatics Centre at the University of Dundee. Members of the Network will use the information you have provided to check if you are suitable for research projects. If you are suitable, we will get in touch with you about relevant studies. Once you hear more about a study, you can decide whether to take part or not.

You can withdraw your details from the Network at any time. In this case, please get in touch with the Tayside office in the first instance (see overleaf).

You can read more details about how we use your information by checking our privacy notice, which is published online at [www.nrs.org.uk/dementia](http://www.nrs.org.uk/dementia).

## TAKE PART IN RESEARCH

**Do you have a memory problem or  
live with dementia, Parkinson disease,  
Huntington Disease, Motor Neurone  
Disease or Multiple Sclerosis?**

We are looking for people who have been diagnosed with any of the above conditions or are worried about their memory to join our research register

[WWW.NRS.ORG.UK/NDN](http://WWW.NRS.ORG.UK/NDN)

Please seal here

If you are interested in participating in research, please complete the information below, detach, seal using the tapes edges and return freepost. We will then contact you.

### DIAGNOSIS (if known):

- |                                      |                          |
|--------------------------------------|--------------------------|
| No diagnosis                         | <input type="checkbox"/> |
| Mild cognitive impairment            | <input type="checkbox"/> |
| Dementia                             |                          |
| Alzheimer Disease                    | <input type="checkbox"/> |
| Vascular Dementia                    | <input type="checkbox"/> |
| Dementia with Lewy Bodies            | <input type="checkbox"/> |
| Frontotemporal Dementia              | <input type="checkbox"/> |
| Unsure which type                    | <input type="checkbox"/> |
| Parkinson Disease                    | <input type="checkbox"/> |
| Huntington Disease                   | <input type="checkbox"/> |
| Motor Neurone Disease (MND)          | <input type="checkbox"/> |
| Multiple Sclerosis                   | <input type="checkbox"/> |
| Multiple System Atrophy (MSA)        | <input type="checkbox"/> |
| Progressive Supranuclear Palsy (PSP) | <input type="checkbox"/> |
